Subject: aggropvp.com

Aggropvp.com is being used for harassment, defamation of character, unauthorised use of images of me and is stalking me.

The owner is known for ddosing, he recently hacked my Nitrado.net account and he is using alt accounts virtual machines and vpns to bypass blocking to continue to stalk and harass me. Please do something about it.

He uses inspect element to edit messages to make it look like I've said stuff I haven't.
