Hi,

Thanks for getting back to us.

I wanted to clarify that we are solely a review platform and do not engage in matters beyond reviews and our guidelines. Unfortunately, we cannot intervene in issues related to users or customers harassing you on other platforms.

We understand the importance of protecting your business reputation and we always consider the potential impact a review can have on a business. Therefore, don't hesitate to flag any review for the relevant reason, and we will be more than happy to open an investigation to assess the review.

For more guidance, you can visit the following link: [For which reasons can businesses flag service reviews?](#)

Should you have further questions, feel free to get back to us at any time.

Kind regards,

Jomana E,
Content Integrity Team

Bro, I don't care about which email address I'm using, I care about the fact that they people are harassing me and you're ignoring the proof I consistently send and let them use their lies to turn customers away from my business and to their own.

They haven't ever used my service or been in my discord because they were banned from the start. They could never have had access to it because I banned them from the first day. They use virtual machines and 120 websites to manipulate everything and when I haven't recieved a single legitimate negative review, you are allowing the exact same lies the last review I got removed said? How can I get it through your head that they have never had access to my business because I banned them before I started the business as they have done this to their competitors for YEARS!

THEY DIDN'T USE IT, THEY CAN'T PROVIDE DETAILS OR PROOF AND YOU STILL LET THEM SLANDER AND DEFAME MY BUSINESS!

Hi,

Thanks for your email, sorry to hear that.

If you don't recognize the reviewer or you don't think they've had a genuine experience with your company, please note that you must first [request information](#) from the reviewer before you can flag the review as "Not based on a genuine experience".

We can see that you've claimed your Trustpilot profile, so we must ask you to flag reviews via your business account. Doing so automatically triggers our investigation process and helps us get all the information we need to handle your request. See our article ["How to flag reviews from your Trustpilot Business account"](#) for a step-by-step guide.

Kindly be informed that we are not a governing body and cannot take action in private matters between reviewers and businesses outside of our platform. We just moderate our platform to ensure our rules and guidelines are followed.

Please if you have any further questions or concerns don't hesitate to reply back, or you can check our [help center](#).

Best regards,

Mohamed M,
Content Integrity Team

****name**** (13/09/2024 12:04)

For the last 17 months I have been harassed, stalked, bullied and borderline been pushed to suicide. I have made an attempt once. A developer I had on my team refused to contribute to the workload, he told me if all I care about is money, he was out, so I took my code, that I can prove I wrote more than 90% of. He also had access to my other bots code and has now shared it around to multiple others to rally their support behind him. The most recent review is from that person. He never used my bot, or my services, instead I helped him write the code for his website, couple months later he tells me he believes me about this army of toxic liars because he was given the code too (provable), once I shared the video proof, I was attacked all over facebook, reddit, youtube and discord by these groups. (All provable)

The person (Known as DayZ BoosterZ who I had just left a review for today after all this happened), tried to make a deal with me, the deal was for me to code my bot to conform to his code to make them compatible and remove my review, or they would continue, I refused because I have integrity.

He then proceeded to call me a pedophile and a woman basher, then renamed his discord account to "Anthony Broadie Pedo".

This group have posted pictures of my 3 and 6 year old child, accused me of molesting them, then spread all around to the whole community that I'm a pedo child molester, but the only way for any of them to have ever got a photo of my children, is from being a friend on facebook, the only person out of them that has ever seen my facebook, is the former co-worker/developer who stole from me and orchestrated this whole thing. I have 287 files on a usb I am taking to the police station, they include screenshots, videos, pdfs, emails and so much more. I have been through hell for 16 months so unless someone can confirm they have used my services, remove their goddamn reviews because it is just these fucking liars using my kids to make me seem deranged to illustrate their narrative. Look at all the other reviews. the two negative are just slanderous bullshit and it's so goddamn obvious.

If there was any truth to their slanderous bullshit about unencrypted information, the only way someone would be able to tell is if they were doing something illegal. They have tried this lie for over 6 months. I continuously prove it but they stand by it because of how it sounds.
