I have been limited until the 9th of January 2024 for "harassment and bullying" and I believe this was an error. I have been told by people they will rape my entire family and those people don't even get a warning, so please, show me what I did that broke the community guidelines that's worse than the attached images.

This is a setup, I made a bot, Kamikaze & Crix have been using alts and sending people to harass me, bait me and stalk me to get me banned because I was working with Kamikaze originally until I learnt he had malicious intentions with his bot. This link has more proof they're harassing me, it's a private hosted image album
