Re: Unknown

NOTICE TYPE: Defamation

Legal Complaint

The content at the listed URLs is unlawful because it constitutes defamation under the Defamation Act 2005 (NSW) and equivalent Uniform Defamation Laws across Australia.

Publication: The posts and comments are published publicly on Reddit and associated competitor websites (aggropvp.com, skynetslegion.com), making them available to a wide audience.

Identification: The content expressly names my business, Legion Killfeed, and myself ("Soul"), so readers clearly understand the statements refer to me and my service.

Defamatory Meaning: The material accuses me and my business of misconduct, dishonesty, and other negative behavior. These statements are presented as factual assertions, not opinion, and would cause a reasonable person to think less of me or my business.

Falsity: The allegations are false. They were created and promoted by a direct competitor in order to harm my reputation and divert customers. None of the claims can be substantiated by evidence.

Harm: These statements have caused reputational and commercial damage by misleading potential customers into believing false claims.

No Defences Apply:

The statements are not substantially true (Defamation Act 2005 (NSW) s.25).

They are not "honest opinion" because they are presented as fact without a factual basis (s.31).

They are not privileged communications.

Under Defamation Act 2005 (NSW), s.4, matter is defamatory if it "tends to lower the reputation of the plaintiff in the estimation of ordinary reasonable people." These publications clearly meet that test.

Accordingly, the material is unlawful because it is defamatory, false, and malicious in origin, published with the intent to damage a competitor. ...

URLS OF ALLEGEDLY 01. www.reddit.com - 7 URLs

DEFAMATORY MATERIAL: 02. skynetslegion.com - 1 URL

03. aggropvp.com - 1 URL
