Reply from Legion Killfeed - DayZ Discord Bot Updated an hour ago

User asked whether Legion could run alongside a competitors bot because user wanted to use that bot's shop/trader feature with our economy system, then said they would cancel and come back once mine was fixed at 10:00 AM, Legion was then removed from users DayZ server at 11:00 AM by user..

The shop/trader feature has never been fully functional and it states so on the website. User was made aware of within 19 minutes of subscribing two months ago. The bot itself was not "down", it never has been down and I explained that more than once. Legion also does not sell separate feature tiers or a separate "shop bot"; one subscription includes the available features.

The behaviour also looked like a competitor known for these attacking reviews (Mathew Trojanowski from Skynet @ killfeed.com). That concern is strengthened by the illegal review directing people to Mathew Trojanowski from Skynet's Reddit slander.

Much like Trustpilot, Reddit refuses to apply the basic legal standards after notice. This person is expressly violating Trustpilot's own Terms of Service.

If there is a genuine billing/subscription issue, it will be handled through the proper PayPal channels but Trustpilot and Mathew Trojanowski will not extort a refund out of me using reviews and Trustpilot has decided to allow Mathew to attempt to abuse their platform while he violates Trustpilot's guidelines

(We can't pay for reviews, this account is trying to force me to refund his lying ass to get this review removed, that is a crime)

This review does not reflect the timeline that shows the user removed their own access. The user then provoked an argument where I calmly explained how ridiculous they were being, the user then replied insulting me.

I said "I'm not here for your drama and I was trying to be nice but if you

Soul LGION Mon 25 May 2026 2:56 PM
Cancel then? I don't mean to sound rude here but threatening to cancel will not change the fact that I'm still working on fixing it, I've not hidden that it's not working, I expressly keep telling people that it isn't, I don't know how else to communicate it to you?

I have been absolutely transparent entirely + had a lot of stuff outside the bot to deal with.

You've already remove the bot so there's no point answering your question but I will anyway, no, Legion Killfeed with not work with DayZ++, I wouldn't even consider it considering the sly ways they have people harass owners to switch bots (provable accusation, there was a ticket where they had one of their partners DMing my subscribers last year)

but I'm telling you now, DayZ++ staff will not give you the same support at all so any issues with them and you're left guessing so have fun with that

R-y_smith Mon 25 May 2026 5:44 PM
Read your're message pal i never threatened to leave. I said ill use another bot let me know when you get the fix in and ill come back. I struggle to believe a man as intelligent as you i can't see the reasoning behind it and understand the term let me know when its fixed and ill come back.

Never had any complaints on the bot or yourself mate

But for a server thats struggling to get off the ground the few i have are causing a scene

Got to do what I've gotta do

You've explained you're way of messages i don't lack intelligence i can take you with a pinch of salt i have no need to give myself an ego boost by publicly slating you're character

Soul LGION Mon 25 May 2026 5:56 PM
I wasn't being a dick? I don't know why you are taking me as being aggressive or rude when I wasn't? I pointed out that you are doing exactly what DayZ++ wants because they pay people to harass server owners, in 2024 they were busted for it in this discord

I was not being whatever you think I was, I am just so used to the same abusive shit from people so I am very cynical about it but I was just trying to warn you that they are sketchy. Right here is proof their partners lie to people.

I can even show a video of them violating discord ToS using oauth abuse to gain access to someone else's discord, like idk why everyone thinks I am being aggro when I'm genuinely not.

R-y_smith Mon 25 May 2026 6:03 PM
Appreciate the clarification, and I'll take it at face value. For what it's worth, I went with Hulk, not DayZ++ -- so the warnings, while noted, weren't aimed at anything I was actually doing. That's part of why the earlier replies landed the way they did: I asked a straight question about compatibility and timing, and got sarcasm and a crayons line back.

I'm not interested in dragging this out or "publicly slating" anyone -- I said that already. But for future paying subscribers asking reasonable questions while your bot is down, the crayons routine isn't it. You're clearly capable of the tone you've used in this last message. Lead with that one next time and you'll have far fewer of these conversations.

I'll check back in when the fix is live.

Soul LGION Mon 25 May 2026 6:16 PM
"The shop bot" isn't a thing. The trader is down. The trader doesn't work. I am trying to fix it, I don't know how else to explain that to you, it's not a separate thing, it's a feature that is broken and I am trying to fix it.

Again your crayon shit makes no fucking sense, I never called any subscriptions anything different? I never gate my functions by tiers, it's entirely included in any subscription?

And yes, I am swearing more and saying "get over it" because you aren't comprehending basic english and it's pissing me off.

Soul LGION Mon 25 May 2026 6:24 PM
I have to laugh at the irony

This right here is how the shit keeps getting put off, because I have to go and argue the basic sentiments behind every single message on every single platform so Google stops indexing all the crap people have spread, I end up spending more time arguing about the meaning behind messages than I do working on code and that does piss me off, immensely, because if you stopped acting like I was attacking you, left your pride or ego or whatever makes you think I am being a cunt out of it, I wouldn't be here, defending my work and myself from something that will again be turned into another misinformation piece because you keep thinking it's a different bot or something when it is a function included in the product that was only working temporarily and has very clear messages attached to everything about it explaining it's not yet working.

to explain that better

When you say "bot down" people believe my bot hasn't been working when it has, consistently, for 3 years.

Then if you say that on facebook, insta, twitter, etc, I then have to fight with that platform to prove that my bot is never down.

R-y_smith Mon 25 May 2026 6:26 PM
Trader shop bot whatever you maybe call it internally, from my end the shops not working causing my player base upset thats the point and you know it. And "I don't have the time nor the crayons to explain things to you" was your line not mine so own it. on adhd aswell, ive got it myself pretty severely and still manage not to talk to paying customers like that so that excuse only stretches so far like I've said im not a child I wouldn't publicly do anything to slate. Ill be back when its sorted. Ill leave the last word to you, you seem to need it more than i do.

Soul LGION Mon 25 May 2026 6:27 PM
I would have had it finished today too but my fiance is on bed rest because she has open heart surgery in less than 60 days so I had to take the kids to a birthday party on the weekend because she couldn't and it delayed my time available for code

What the fuck.
I don't have the time nor the crayons to explain things to you
THAT WAS A REPLY FROM THE BOT THAT DOES IT WHEN YOU SWEAR.
